

GE Interlogix

One great security camera. One small package.

ExpressCam high-resolution camera includes lens, mounting kit and power supply.

The ExpressCam offers high-resolution, low-light performance in a compact package that comes with everything you need for easy installation.

Its powerful performance includes EXview* technology that delivers usable images in extreme low-light conditions. The EXview CCD processes light at levels so low that you can obtain images even in unlighted areas. ExpressCam also offers advanced digital auto-tracking white balance for accurate color even under adverse lighting conditions. It comes with a choice of two varifocal DC auto-iris lenses, and it features 480 TV lines of resolution, digital signal processing, and automatic backlight compensation so foreground objects aren't silhouetted against bright backgrounds.

Best of all, ExpressCam comes with everything you need to install it. Its package includes a power supply, a mounting bracket and BNC connectors.

The ExpressCam package includes a camera with built-in varifocal lens, plus a power supply, mounting bracket, BNC connectors and mounting screws.

ExpressCam's housing swings open for easy access, letting you precisely focus the lens once the camera is mounted.
