- Custom search fields for quick comprehensive report generation
- Year 2000 compliant

N-750 Windows Access Control Software

Northern Computers' WinACAS software in conjunction with Northern's N-750 access control panel and accessories puts you in total control of your facility's security needs. WinACAS can be easily programmed, allowing you to add or remove a user from the system database in minutes. This saves you the time ordinarily involved with collecting security cards or the cost of re-keying locks.

WinACAS has a versatile full featured design which allows you to easily assign clearance to employees who are scheduled to work on weekends or evenings, change system configuration, and reprogram time schedules. User-access profiles are available at the push of a button. You don't have to invest in new hardware, rewiring or even a service call, WinACAS puts you in the driver seat.

WinACAS is the most comprehensive and easy-to-use software for managing your N-750 access control system.
